120W Two-channel Constant Current Outdoor Driver

Features

- High Efficiency (Up to 90.0%)
- Two Channels Output
- Constant Current Output
- 0-10V Dimming Control
- Input Surge Protection: DM 4kV, CM 6kV
- All-Around Protection: OVP, SCP, OTP
- Suitable for UL Dry / Damp / Wet Location
- Class 2 Output
- TYPE HL, for use in a Class I, Division 2 hazardous (Classified) location

Description

The *EUC-120D210DT(ST)* series is a 120W, two-channel, constant-current outdoor LED driver that operates from 90-305 Vac input with excellent power factor. It is created for many lighting applications including flood, tunnel and street, etc. The high efficiency of these drivers and compact metal case enables them to run cooler, significantly improving reliability and extending product life. To ensure trouble-free operation, protection is provided against input surge, output over voltage, short circuit, and over temperature.

Models

Protection Functions

| Parameter | Notes |
|-----------------------------|--|
| Over Temperature Protection | Decreases output current, returning to normal after over temperature is removed. |
| Short Circuit Protection | Auto Recovery. No damage will occur when any output is short circuited. The output shall return to normal when the fault condition is removed. |
| Over Voltage Protection | Limits output voltage at no load and in case the normal voltage limit fails. |

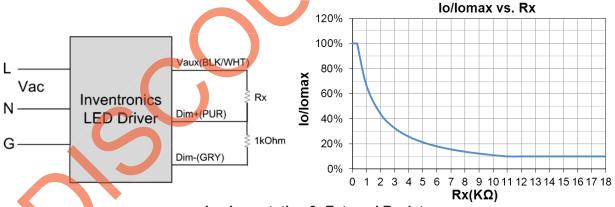

Dimming

0-10V Dimming

Recommended implementations of the dimming control are provided below.

Implementation 3: External Resistor

Notes:

- The dimmer can also be replaced by an active 0-10V voltage source signal or passive components like resistors and 1.
- 2. Do NOT connect Dim- to the output V- or V+, otherwise the driver will not work properly.
- If 0-10V dimming is not used, Dim + can be either open or connected to Vaux.
