

inventronics

February 3, 2025

Dear Valued Customer,

As published by the White House on February 1, 2025, President Trump is implementing a 10% additional tariff on imports from China. This will increase the tariff on Inventronics products manufactured in China from 25% to 35% effective Feb 4, 2025.

The notice can be found at <https://www.whitehouse.gov/presidential-actions/2025/02/imposing-duties-to-address-the-synthetic-opioid-supply-chain-in-the-peoples-republic-of-china/>

Consequently, we have revised our program for addressing this additional tariff on our product manufactured in China as detailed below in order to provide some relief to our customers

- Inventronics will absorb a portion of the tariff and will only pass along 26% (instead of the full tariff of 35%).
- Effective today, all new orders will be subject to a 26% tariff adder.
- Existing orders previously placed with Inventronics with confirmed ship dates of April 30th or earlier, will be invoiced with an 18% tariff adder when shipped.
- Existing orders previously placed with Inventronics with confirmed ship dates of May 1st or later, will be invoiced with a 26% tariff adder when shipped.
- Existing orders with confirmed ship dates of May 1st or later that are pulled into April 30th or earlier, will be invoiced with a 26% tariff adder when shipped.

Note that implementation of these tariff adders has not affected our sales prices and that our pricing remains unchanged.

Thank you for your business. We are grateful for your patience and understanding during these challenging times in our industry. We will continue to monitor The White House and U.S. Trade Representative (USTR) actions and keep you posted of any changes.

Please contact Inventronics sales or customer service with any questions you may have.

Regards,

Jeff McClendon
Director of Sales, North America
